# Overview

Create a simple custom feature filter

Add a Feature Filter alias

Add configuration parameters to custom Feature Filters

Create an HttpContext-aware Feature Filter

- Enable feature if “beta” cookie present
- Add cookie name configuration

## Summary

### Created a simple custom feature filter

- RandomFilter : IFeatureFilter
- "Name": "Random"

`[FilterAlias("CreditCards.RandomFilter")]`

### Added configuration parameters

- RandomFilterSettings class
- `context.Parameters.Get<>();`

### Created an HttpContext-aware Feature Filter

- BetaCookieFilter
- IHttpContextAccessor
- CookiePresentFilterSettings
